

# Lecture 9

Wednesday, July 14, 2021 19:27

## Science of Adaptation: The History and Biology

- Biological things respond to their environments
- All living cells spend their lives making changes to better tolerate their environments
- Every living thing respond to threats and stresses they endure
  - o Cells, enzymes, tissues, monsters
- Refer to notes from stress phys

I'm done with *Lecture 9* notes.
